June 26, 2019 perl-support.vim Page 2 / 2

#### Run

Specify command line arguments for the script in the current buffer. Use tab expansion to choose a file or a directory.

:PerlScriptArguments

Specify command line switches for the Perl interpreter.

:PerlSwitches

#### Perlcritic

Ex commands for **perlcritic** (version 1.01+) Use tab expansion to choose the severity or the verbosity.

:CriticSeverity 1 2 3 4 5 brutal cruel harsh stern gentle

:CriticVerbosity 1...11

:CriticOptions option(s), see perlcritic(1)

### Regular Expression Tester

Ex command for the regular expression tester. Set control character replacements for newline and tabulator used to display the results of a match, e.g.:

:RegexSubstitutions '\$~'

## Profiling

The following ex commands can be used to sort a profiler report in the quickfix window.

Use tab expansion to choose the sort criterion or the file name.

For Devel::SmallProf

 $: Small Prof Sort \quad file-name | line-number | line-count | time | ctime \\$ 

For Devel::FastProf

 $: Fast Prof Sort \qquad file-name | line-number | time | line-count$ 

For Devel::NYTProf

:NYTProfCSV Read a CSV-file.

 $\textbf{:NYTProfHTML} \qquad \text{Read the HTML-reports with an external viewer (GUI only)}.$ 

:NYTProfSort file-name|line-number|time|calls|time-call
